

## Today's Science

- Find up-to-date news about science, written for students.
- Updated weekly with thousands of resources with graphics and images
- Important developments in biology, chemistry, the environment, space, physics, and technology.
- Interviews with scientists in the field

### How do I get to Today's Science?

1. Start at the Library Connect web site: [multcolib.org/libraryconnect](http://multcolib.org/libraryconnect)
2. Click on **middle school**.
3. Scroll down to the Resources section.
4. Click on **Today's Science**.
5. Click on the **Begin using this resource** button.
6. Type in your Library Connect or library card number and password. Occasionally, there may be difficulties loading a database. If you aren't able to get in, go back and try again. If the database still doesn't open, contact the library at [multcolib.org/contact](http://multcolib.org/contact).

The screenshot shows the homepage of the 'Today's Science' website. At the top left is the 'Facts On File' logo and the site title 'Today's Science' with the tagline 'Science News Written Especially for Students'. Navigation tabs for 'Topic Index' and 'Resources' are visible, along with a search bar and an 'Advanced Search' link. The main content area features a 'FEATURED ARTICLE' titled 'Do Black Holes Really Destroy Everything?' by Samuel Zimmerman, dated August 2016. The article includes a red and black graphic of a black hole and a brief description. Below this is another article titled 'A Honey of a Partnership' by Patricia Waldron, dated August 2016, with a small image of a bird. On the right side, there is a 'Video News Briefs' section with two video thumbnails: 'Tracking Weather Near the Ground' and 'Tackling Concussions'. Below the videos is a 'View All Video News Briefs' link. At the bottom right, there is a 'Conversations with Scientists' section featuring two scientist portraits: Kenji Ohta (Revealing the Earth's Core) and Peter Stott (Assessing the Risks of Extreme Weather).

You can browse the featured articles on the main page, or click on the **Topic Index** for a long list of topics. Or do a keyword search by typing phrases in the search box.

You now have a list of articles about your topic. You can use the check boxes on the left to refine your list by date, subject area, or type of article (encyclopedia, cartoon, interview, etc).
